

Polyflex SR Series

8 0 0 - 3 4 5 - 6 2 9 4

Shingle Belting's Polyflex 20SR and 30SR are bottom reinforced version of the Polyflex homogeneous belt types with the following advantages:

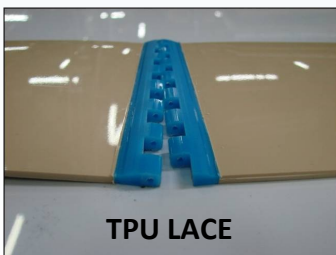

An excellent replacement for traditional plied belts with the additional advantage of quick splice capabilities

Can be Butt or Leister welded, Finger spliced, or TPU Laced

Flexible multifilament fabric minimizes stretch and is ideal for troughed conveyors

Easily Repaired - damaged belts do not have to be discarded

SR belts are easily edge capped

TPU LACE
