SHINGLE BELTING

In addition to V-guide, Shingle Belting offers an endless variety of extruded belting.

Engineered thermoplastic profiles in:

- Polyurethane
- PVC
- Polyester
- Polyolefin and many other resins

Belting can be manufactured in solid, hollow, or reinforced with polyester or steel cord

Many shapes are available. Common profiles include:

- Round
- Vee
- Square
- Channel
- Pentagonal
- Ridge-top
- Flat (for Edge Capping)
- HF Cleats

These belts can easily be made endless and are FDA/USDA approved

A wide range of colors and surface textures can also be produced

Shingle extrusions come in a variety of durometers; have excellent chemical resistance; and are abrasion resistant
