

## SG Nycor Folder-Gluer Belting

800-345-6294

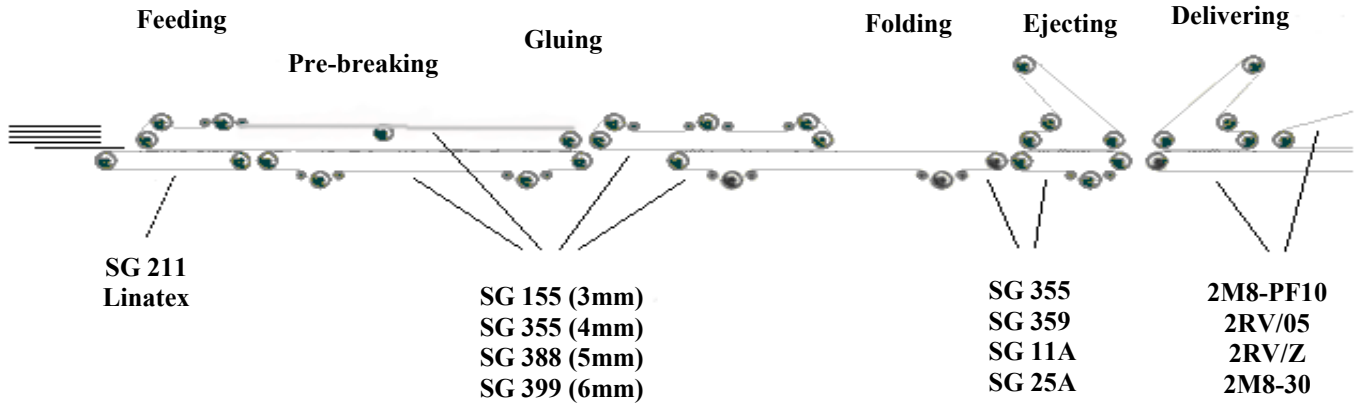

Shingle Belting's SG155, SG355, SG388, and SG399 Nycor belts have been proven winners in the folder-gluer belting market for many years. These products are manufactured in the USA and available from stock for quick deliveries.

These Shingle Nycor products which have been designed around the needs of box manufacturers worldwide offer the following advantages:

- Shingle Belting's highly abrasion resistant rubber covers are the best in the business and will **extend your belt's life** with decreased cover wear
- Many of our competition's series of folder-gluer incorporate lighter duty nylon cores whereas Shingle Belting's SG series uses 20 & 30 band nylon cores only. This translates to **less belt stretch** and **better tracking** due to greater lateral stability
- At Shingle Belting we manufacture our nylon core cements in-house. Our special formulas maximize both belt adhesion and splice integrity

Please contact your local Shingle Belting technical sales expert at 800-345-6294 for any additional information or visit our website at [www.shingbelting.com](http://www.shingbelting.com).

## Cardboard Folding and Gluing Machine
